PARTNER SOLUTION BRIEF

MAGOS

Hanwha Vision

Magos and Hanwha Join Forces to Deliver Comprehensive Perimeter Security Solution

Magos' radar-based AI-driven, combined with Hanwha's technology, delivers unmatched security. This layered approach enhances visibility, classification, and response for robust critical infrastructure protection.

REAL-TIME ALERTS

MASS enables PTZ cameras to automatically slew-to-cue on targets, streaming relevant video directly to Hanwha's VMS.

COMPLETE CONTROL

Hanwha's VMS, Wave, integrates seamlessly with the MASS client, providing full control and management of the security software.

REC
KEEP TRACK OF YOUR DATA

With Hanwha VMS, you can connect PTZ cameras to designated alarm zones, record, log, and track both video and MASS channels, and conduct detailed analyses of triggered alarm scenarios.

EFFICIENT MULTI-LAYERED SECURITY

The integration of Magos radars with Hanwha cameras and VMS enables a seamless response system, moving smoothly from radar detection to visual confirmation and automated tracking. This setup optimizes operator workflows, ensuring efficient, precise responses to security threats

MAGOS

# Seamless Threat Management: Detect, View, Classify, Alert

DETECT
MAGOS RADARS
Ground-based radars with detection range of up to 800m for human and 1000m for vehicle.

VIEW
HANWHA PTZ
Hanwha' PTZ camera auto & continuosly cued-to-target.

CLASSIFY
MASS+AI SOFTWARE
Minimize false alarms with AI classification technology that differentiates between humans, vehicles, and animals targets.

ALERT
WAVE VMS
Alarm raised and VMS event created only on valid targets.
